

Anish, playing spoons.

A playful study of reflection, the idea for Anish was born when designer Dodo Arslan, while playing with his daughter, became fascinated by the almost infinite reflections spoons unleashed due to their concave and convex surfaces. Taking this idea to a larger scale, Dodo took inspiration from Italian flatware manufacturer Sambonet and created a pendant composed of a range of spoons, from the smallest teaspoon to serving spoons, which magnify the reflective quality of this shape. The result is an installation that creates a “galaxy” effect of seemingly endless light. Design Dodo Arslan.
